

A pixel art scene showing a character with brown hair and a white shirt standing in a house with a blue window. The house is surrounded by green trees and a grassy field. Other characters are visible: one with an axe, one with a sword, and one with a basket of fruit. The scene is set on a green checkered background.

OASIS

LITEPAPER

Abstract

The OASIS metaverse welcomes all nature-loving blockchain gamers to create, own, play, earn and interact with like-minded natives in its virtual world of lush greenery and natural beauty.

The team is building an ecosystem of games within the OASIS metaverse on the Binance Smart Chain; harnessing the power of non-fungible tokens (NFTs) and bridging social gaming with decentralized finance (DeFi) with the goal to increase participation in both social gaming and digital assets trading. Oasis promotes full ownership and custody of everything that players create in-game, including characters, avatars, equipment, accessories and many more elements in the Oasis metaverse.

Oasis is a blockchain Metaverse; a one-stop blockchain realm that offers different (gamified) blockchain services and products, script-less adventures, as well as an in-game economy with infinite possibilities.

Team OASIS has produced the game design overview and is developing the core features. The minimum viable version is already available for early-phase players at projectoasis.io, while additional features and items will be introduced in phases (please view our roadmap).

Natives

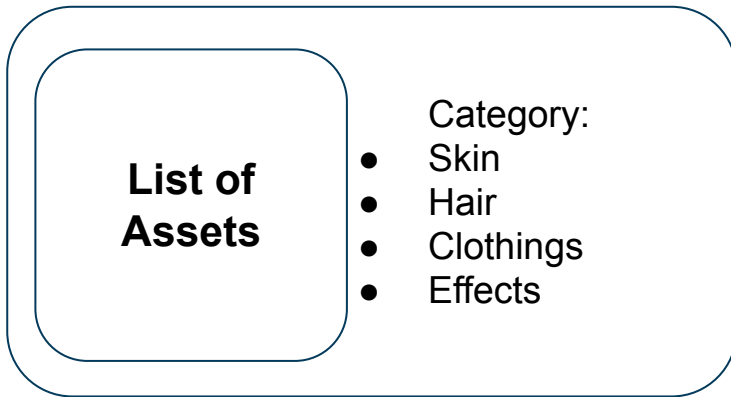

Your character in OASIS represents YOU! - inspired by the movie, Ready Player One - in which users are able to interact with one another while utilizing the avatar that they desire.

We intend to create a virtual world of NFT characters where each character, which we identify as Natives, are able to communicate, connect, trade and transact in OASIS.

Natives

Auto Generate

Belongs to "wallet address"

Oasis Square

Oasis Square is the place where all Natives gather.

There is also **Agora**, the central marketplace where Natives can gear up with items officially released by the Council, or trade unique items created by other Natives. All trading and swapping of game items are performed by using the \$OASIS tokens - the native utility and governance token within the entire OASIS metaverse.

“Realms” is the cross-chain mechanism featured in the Oasis metaverse. With Oasis “Realms”, it is possible to create a multi-metaverse across various blockchains; to develop a vibrant, in-game economy where Natives can work together to govern, to dictate and to live a different life in the OASIS metaverse.

The Center of Administration for OASIS is the Council, a decentralized autonomous organization (DAO) governed by all Natives who hold OASIS tokens. In the Council, Natives can propose and vote on matters relating to the OASIS metaverse in a democratic fashion.

Realms

The **OASIS** metaverse will consist of a few maps, namely **Realms**. Each of these Realms will represent a part of the world that relates to a map from a different blockchain.

For instance, we may have “Polka Realm” for Polkadot, and “Heco Realm” for Heco chain, and so on.

The Realms are to be built on the respective blockchains that we integrate with, the entire Realm will consist of an ecosystem from the blockchain, potentially spanning from DeFi projects, entertainment, to other blockchain services. Users can simply cross from one Realm to another as long as they connect their respective wallets and also meet specific requirements.

Different Realms will offer different modes of activities and experiences, similarly to how we would travel from the city to enjoy parties, concerts, and shopping; to the outskirts where various adventures await; and the mountains and ocean side where you can participate in more challenging activities; the metaverse of OASIS allows you and your Native evolve to suit the different experiences that entail.

Decentralised Finance

The OASIS will have its own one-stop DeFi center within the metaverse, for Natives to stake their tokens to earn rewards, as well as Liquidity Mining.

We will also have **OLá**, Oasis's very own launchpad. We will be integrating a launchpad into our metaverse, allowing great projects to grow and flourish while allowing Oasis Natives to participate in great projects from the community.

Decentralised Autonomous Organisation

The Oasis metaverse will host its own Decentralised Autonomous Organisation (DAO), which will be run by our Council and governed by \$OASIS token holders.

The Oasis DAO will be unveiled when the basic infrastructure of the metaverse is built, and ready to write its own script.

The Gamification of DeFi in the OASIS Metaverse

The Gamification of DeFi in the OASIS Metaverse

METAVVERSE

Decentralized finance (DeFi) may appear to be exclusive to crypto traders and investors now, but that is about to change. To encourage greater accessibility to DeFi for the masses, OASIS will introduce DeFi into its blockchain gaming metaverse. The team at Oasis believes that the social gamification of DeFi yield farming will attract a new generation of DeFi adopters and enrich the overall gaming experience in OASIS.

In order to participate in the DeFi yield farming in OASIS, players simply move their Natives character to the Oasis Swap building. Natives can check out the different yield farming pools available, their annual percentage yield, and create the applicable LPs for their desired farming pools. Yields from staking and farming are displayed in the form of vegetables or fruits, where Natives can harvest their yield in the form of Oasis Tokens directly into their connected wallet.

This is a simple and fun way for Natives to farm OASIS tokens (\$OASIS) and other supported digital assets, simplifying DeFi; making it easy and enjoyable for both experienced DeFi enthusiasts and newbies alike!

Oasis: Tokenomics

Token Metrics	Allocation	Token Amount (\$OASIS)	Price	Lock Until	Vesting (Months)	Notes
Team Tokens	9.29%	1,300,000		12 months	24	8.3% monthly starting from month 13
Operations & Marketing	13.57%	1,900,000		3 months	13	10% monthly starting from month 4
Advisors	4.00%	560,000		6 months	18	8.3% monthly starting from month 7
Seed Sale	10.71%	1,500,000	\$0.10	-	9	20% at TGE
Private Sale/Strategic Sale	7.14%	1,000,000	\$0.15	-	6	30% at TGE
Public Sale	10.71%	1,500,000	\$0.20	-	1	40% at TGE, 30% every 2 weeks
Early Incentive & Rewards	20.00%	2,800,000		-		Staking rewards for Oasis participants
Ecosystem Development	13.57%	1,900,000		-		For development of Oasis ecosystem
DEX Liquidity	4.25%	595,000		-		100% used at TGE
Play to Earn & Community Enrichment	6.75%	945,000		-		Phase by phase rewards campaign
Total	100%	14,000,000				

TGE Circulation Token Type	Token Amount on TGE
Seed	300,000
Private	300,000
Public	600,000
	1,200,000

Market Cap @ TGE*
\$240,000

*Excluding DEX liquidity

FEATURES OF THE OASIS TOKEN

Purchasing In-Game Items

\$OASIS can be used to purchase in-game assets, land, farming tools and cosmetics for the avatar.

Participate-to-Earn

Users can earn \$OASIS tokens through participation in various in-game events

Staking Rewards

\$OASIS tokens can be used in the system to earn staking rewards. It is designed to encourage users to hold tokens and support the ecosystem.

Governance

Token holders are allowed to participate in the decentralized governance process that decides on the use of revenues, game development and growth of the metaverse.

Gamified Finance (Staking Yield)

Based on our staking and reward projections, we will be able to allocate a fair amount of tokens into staking rewards. This will incentivize stakers to hold their tokens during the early stages of the game development.

FEATURES OF THE OASIS TOKEN (cont)

NFT Collateral

When a user purchases an NFT from the system, a percentage of the purchase price goes into a special collateral account associated with NFT. The user then has an option to re-sell it back to Oasis (which will destroy the NFT) for the price equivalent to the locked collateral (or a percentage of it). When a purchase is completed in OASIS, a small percentage of the tx fee will be burned (as a deflationary mechanism).

NFT Rental

NFTs, including land, can be rented to other players. The smart contract will assure that the borrower cannot resell or destroy the object, and ensure that the object returns to the owner when the rent period ends.

NFT Marketplace

Game items can be traded through the in-game marketplace as well as other NFT marketplaces on other blockchains. It creates liquidity for the assets created through the game and also encourages more players to participate in establishing the OASIS world.

Note: Before the official launch of the metaverse, the OASIS team, along with partners and OASIS Token Holders, will collaboratively assess and review the distinct functions of the \$OASIS token to ensure significant added-value to the OASIS metaverse.

A Letter from the Team

In the OASIS metaverse, each connected blockchain wallet will generate a common Native avatar. With various forms of upgrade available, every avatar will be unique in its own right. Furthermore, every player will also have a high probability of obtaining rare NFTs.

By staking their NFTs Natives have an opportunity to earn rewards according to a certain amount of APY. Oasis will also have its own NFT marketplace, AGORA, rewarding all forms of NFT creations.

We graciously welcome various blockchain service providers and partners to join and collaborate with us, potentially increasing traffic for one another. At the same time, we will also implement various advertising mechanisms to generate more traffic and awareness.

With DAO as a future direction of the project, \$OASIS token holders will potentially be a major influence to the future of the Oasis Metaverse.

The initial token sale we raised will primarily be utilised for game development. We believe that the evolutionary development, a progressive and comprehensive ecosystem, high retention rate of users, and diversified token holders, will greatly enhance the potential growth of the Oasis Metaverse and the Oasis Tokens.

Team Project OASIS

ROADMAP

Q1 2021

- ★ Conceptualisation of Project Oasis
- ★ Formation of the Project Oasis Team
- ★ Starting the Development of MVP

Q2 2021

- ★ Start of Website Development
- ★ Release of Litepaper
- ★ Release of MVP (Testnet)
 - Basic Multiplayer Support
 - Launching of our Chat System, namely CIPHER

Q3 2021

- ★ DEX Integration
- ★ Game world design
- ★ Seed / Private / Public Sale
- ★ Airdrop
- ★ Contract Audit
- ★ OLá (Oasis Launchpad)

ROADMAP (Cont'd)

Q4 2021

- ★ Introduction of AGORA - Oasis' very own marketplace
- ★ Gamified staking farms
- ★ Gamified lending platform
- ★ Cross chain interoperability
- ★ Introduction of "Realms" - representing different blockchains

Q1' 2022 and beyond

- ★ Introducing advertisement module
- ★ Billboard + walking NPC advertisement
- ★ Community land sales + building rental
- ★ Play to earn
